

Embedded Python

(Intro)

Workshop

Alberto Fuentes
Sales Engineer

ObjectScript

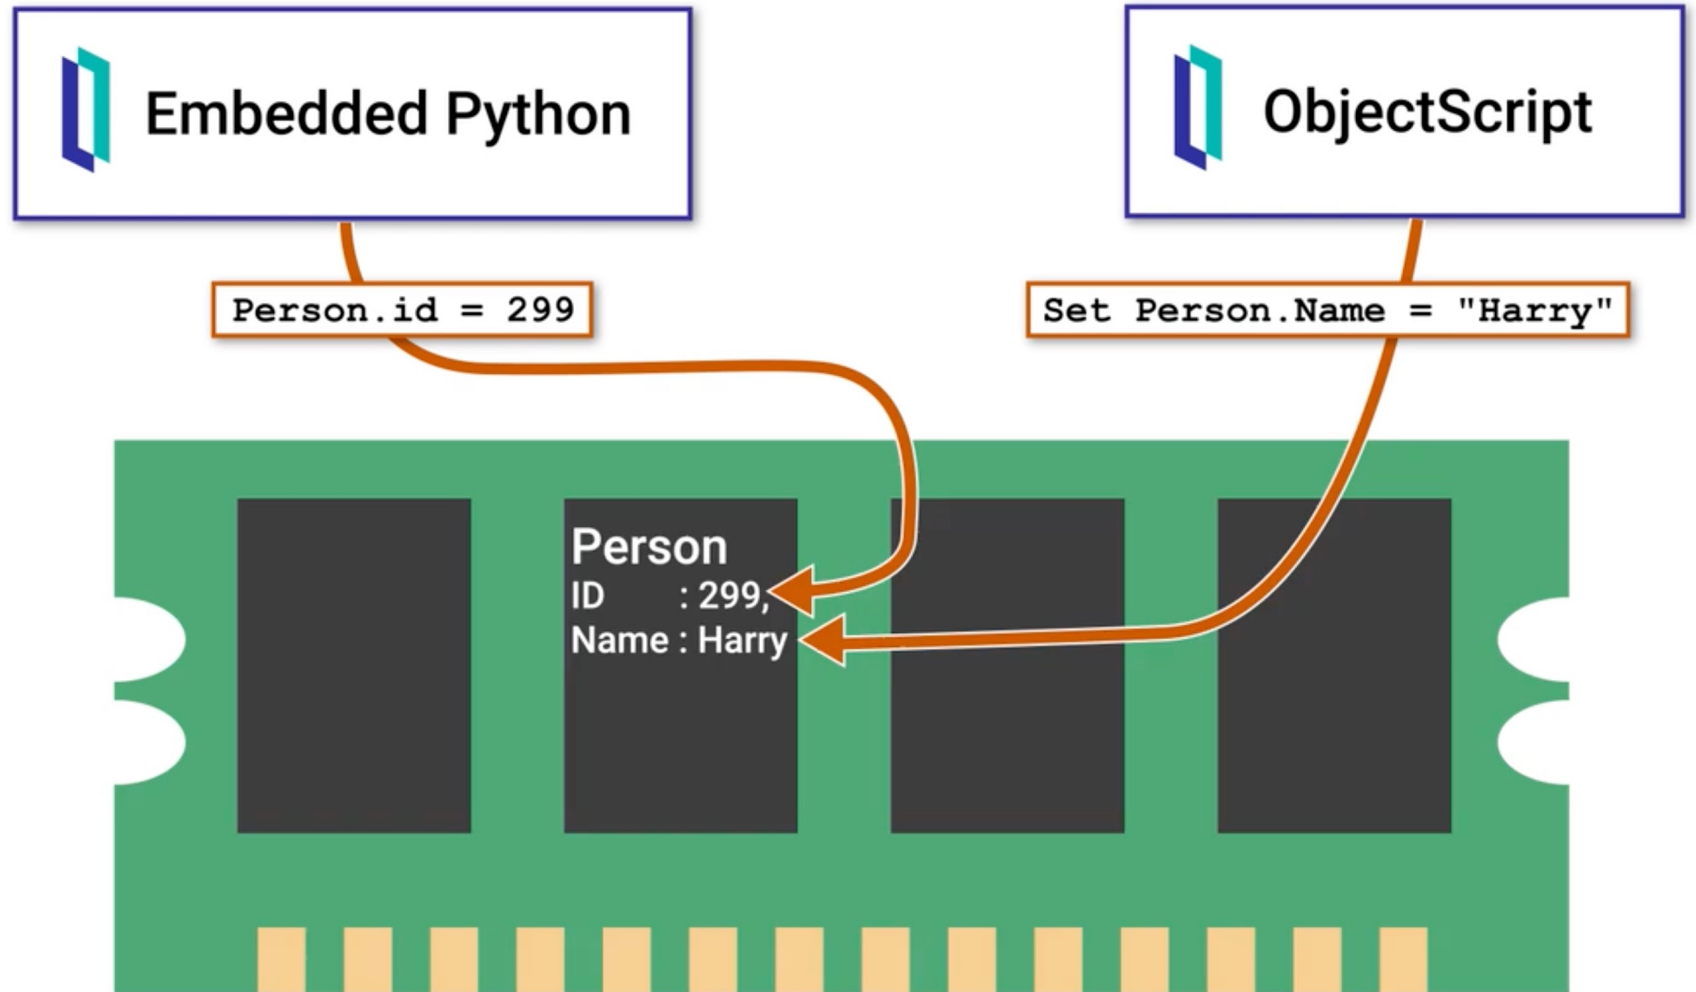

- Built-in programming language
- Interpreted, compiled and run in IRIS
- Executes within the context of IRIS
- Direct access and bidirectional communication between IRIS and ObjectScript

Embedded Python

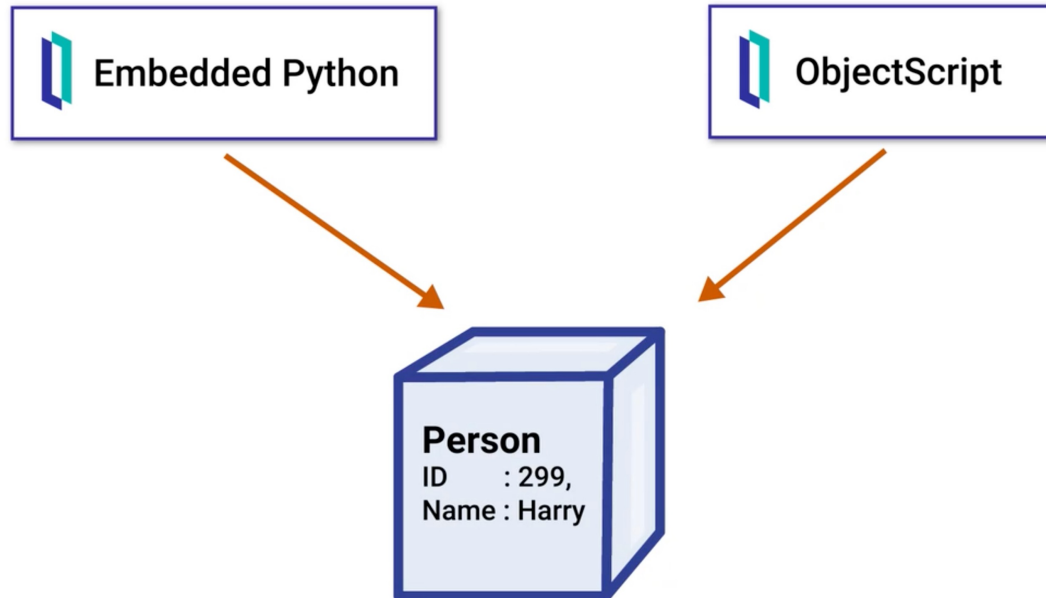

- Extension of Python programming language
- Executed also **within the context** of IRIS
- Python and ObjectScript **share the same process context!**

Embedded Languages

Embedded Python

Choice the language you need

- **Same objects**, you can manipulate them in ObjectScript and / or Python
- You can **choose** the language depending on your needs
- You can incorporate **Python libraries** in your already existing ObjectScript code

**Embedded
Python**
